About Me

I am a resourceful and motivated software developer who is always looking for opportunities to improve my skills in coding. What started as a simple console log of "Hello World" has become a continuous growing passion. It has offered me an engaging challenge to learn more, and create high-quality software with a solid UI and UX.

I am highly-adaptable and have the ability to pick up new technologies in a short period of time. My development and knowledge base is constantly growing, and you can find some of my current work on my GitHub or website.

Experience

Recipe App (forkify-lewisduncan.netlify.app)

A recipe application that interacts with the Forkify API to fetch and display recipe data. Utilises tools such as Parcel JS to bundle modules, and Babel for backwards compatibility.

Portfolio Website (lewisduncan.co.uk)

A responsive portfolio website created using modern HTML and CSS methods to display my other coding projects, as well as showcasing my ability to create a quality UI and UX.

Banking App (bankist-lewis.netlify.app)

A simple banking application which allows users to login, transfer funds to other accounts, borrow funds or close the account. Utilises modern array methods, timers and internationalisation based on account location.

Exercise Tracker App (mapty-lewis.netlify.app)

An exercise tracker for cycling and running in which you can log location of runs and rides on a map. Includes inputs for duration and distance allowing for average speed to be calculated. Interacts with geolocation and Leaflet API to mark sessions on a map.

Skills

Technologies

- JavaScript
- MongoDB
- HTML/CSS
- MaterialUI
- React
- Git
- Node.js
- AWS

Personal

- Problem solving
- Team-working
- Working under pressure
- Fast learner

Employment

2020 - Present

Bank Healthcare Assistant

The Queen Elizabeth Hospital, King's Lynn

Education

2022

The Complete JavaScript Course

Udemy - Jonas Schmedtmann

2022

Build Responsive Real-World Websites with HTML and CSS

Udemy - Jonas Schmedtmann

2015

BEng Mechanical Engineering

Manchester Metropolitan University
